9. ACCUNET® SPECTRUM OF DIGITAL SERVICES (ASDS)-INTEROFFICE

9.2 SERVICE COMPONENTS AND RATES (Cont'd)

9.2.3 CHANNEL OPTIONS

Channel options are features added to a channel to change or augment its transmission characteristics. The channel options available on ASDS are Special Routing, Subrate Data Multiplexing, Signaling Capability, Conditioning and Customer Requested Echo Control.

A. SPECIAL ROUTING OF AN ASDS

An ASDS is normally furnished using a channel selected by AT&T. Various special routing options are available for ASDS excluding 9.6 kbps IOCs, when the required service components are available. These special routing options have associated charges in addition to other applicable charges. If complete Special Routing is not available when ordered, or if it becomes unavailable at a later date due to network rearrangements, Special Routing may be furnished only on a partial basis. The Customer will be advised before partial Special Routing is provided and may cancel the order or discontinue the special routing if the partial Special Routing is not acceptable. No cancellation charge will apply in such cases. The Customer options for special routing are:

- Diversity
- Avoidance
- Avoidance and Diversity
- Custom Diversity

(N)

Special Routing is furnished subject to the availability of channel components.

1. Diversity*

(T)

Diversity is provided when two or more channels are furnished partially or entirely over not more than two physically separated routes. Diversity is furnished for any portion of the channel components or all channel components. If there are more than two services, the services are divided into two groups and furnished partially or entirely over two physically separated routes.

Example 1: The Customer has four IOCs between central offices A and B and specifies that IOC No. 1 be diverse from IOC No. 2. Special Routing charges apply to IOC Nos. 1 and 2. Special Routing charges will not apply to IOC Nos. 3 and 4.

* Avoidance, Diversity, Avoidance and Diversity and Custom Diversity for DSO and FT1 IOCs are discontinued as of April 14, 2010.
